GENERAL INDEX

A

Absciss layer in leaves of Coleus, effect of growth substances 323

Absorption spectra of carotenoids in red and brown forms of a photosynthetic bacterium 406

Addicott, F. T., Effects of root-growth hormones on the meristem of excised pea roots 576

Agglutination test applied to strains of Phytomonas stewarti 64; agglutinin absorption 78

Allen, Ethel K., Response of peanut plant to inoculation with rhizobia, with special reference to morphological development of nodules 121

Allen, O. N., Response of peanut plant to inoculation with rhizobia, with special reference to morphological development of nodules 121

Allison, F. E., Production and oxidation of ethyl alcohol by legume nodules 417

Altsheler, B., "Natural history index-guide" 222

Anatomical and physiological responses of tomato to nutrient solutions 437

Anatomy of Anemopsis flower 749

Anemopsis, floral anatomy 749

Antherozoids of some Characeae 623

Apium, ontogeny of medullary bundles 400

Auxin, use of frozen vacuum-dried material 590

Avena coleoptile, peptidase activity: phytohormone test object 50

Avery, G. S., Jr., Peptidase activity in Avena coleoptile: phytohormone test object 50

B

Baly, E. C. C., "Photosynthesis" 818

Bamford, R., Megagametophyte development in a triploid tulip 699

Beal, J. M., Cytological studies in relation to the classification of the genus Calochortus 810; Effect of indoleacetic acid on thin sections and detached segments of second internode of bean 366; book reviews 222, 223, 414, 638, 819

Bean, effect of indoleacetic acid on second internode 366; histological reactions to l-tryptophane 602; responses to indoleacetic acid 206; to tetrahydrofurfuryl butyrate 373; starch hydrolysis in leaves affected by growth-regulating substances 393; starch hydrolysis in leaves after spraying with alpha naphthaleneacetic acid 97

Beet, effects of environmental factors on photoperiodic induction 557

Bellows, J. M., Megagametophyte development in a triploid tulip 699

Benedict, H. M., Growth of some range grasses in reduced light intensities at Cheyenne, Wyoming 582

Berger, C. A., Reinvestigation of polysomaty in Spinacia 759

"Bibliography of references to the literature on the minor elements and their relation to plant and animal nutrition" 414

Blum, J. L., Responses of sunflower stems to growth-promoting substances 737

Borthwick, H. A., Floral initiation in Biloxi soybeans as influenced by photosynthetic activity during induction period 256; Influence of localized low temperature on Biloxi soybean during photoperiodic induction 792

Bouteloua curtipendula, early development in relation to water supply 499

Braun, A. C., Agglutination test applied to strains of Phytomonas stewarti 64; Agglutinin absorption by different strains of Phytomonas stewarti 78

Brink, R. A., Double fertilization and development of seed in angiosperms 1

C

Calochortus, classification of the genus 810

Campbell, D. H., "The evolution of the land plants (Embryophyta)" 222

Carlson, Margery C., Formation of seed of Cypripedium parviflorum 295

Carotenoids, absorption spectra in red and brown forms of a photosynthetic bacterium 406

Cattell, J., "Biological symposia. Vol. I" 222

Characeae, antherozoids 623

Chemical responses of bean plants grown at different levels of nutrition to indoleacetic acid 206
Chilean Nitrate Educational Bureau, "If they could speak" 639; Second supplement to third edition of bibliography of references 820
Chlorophyll components, influence of preparative procedure 463
Chromosomal association and behavior in autotetraploid grass species 236
Chromosome catenation in Oenothera 143
Coal flora 663
Cocklebur, light and temperature effect on floral initiation 302
Colchicine, polyploid cottons obtained 287
Coleus leaves, effect of growth substances on absciss layer 323
Comar, C. L., Influence of preparative procedure on purity of chlorophyll components as shown by absorption spectra 463
Competition, effect on seedling development 684
Coniferous woods, relation to loss in weight during decay and nitrogen content 382
Cooper, D. C., Double fertilization and development of seed in angiosperms 1
Cottons, polyploid, obtained through colchicine 287
Cypripedium parviflorum, formation of seed 295
Cytological studies of Calochortus 810

D

Davis, G. E., Chemical and histological responses of bean plants grown at different levels of nutrition to indoleacetic acid 206
Day length, effects in Rudbeckia 269
Deam, C. C., "Flora of Indiana" 224
Degener, O., "The new illustrated flora of the Hawaiian Islands (Flora Hawaiiensis)" 223
Desmids of Mirror Lake, Utah 410
"Die Methoden der Fermentforschung" 413
Dill, effects of environmental factors on photoperiodic induction 557
Double fertilization and development of seed in angiosperms 1

E

Eaton, S. V., Influence of sulphur deficiency on metabolism of sunflower 536; book review 640
Eckles, Mary L., Megasporogenesis and development of the megagametophyte in Nothoscordum bivalve 806
Effects of vitamin B_1 upon development of flowering plants 156
Eggers, Virginia, Use of frozen vacuum-dried material in auxin and other chemical analyses of plant organs: its extraction with dry ether 590
Emerson, A. E., book review 412
Environmental factors, effect on floral initiation in Xanthium 339; on photoperiodic induction of beet and dill 557
Evolutionary significance of ring porosity in woody angiosperms 105
Excised pea roots, effect of growth substances on meristem 576
Extraction of auxin with dry ether 590

F

Factor Z, further observations 520
Fassett, N. C., "A manual of aquatic plants" 412
Fertilization and development of seed in angiosperms 1
Feulgen reaction in cytology 225
Floral initiation, effect of environmental factors in Xanthium 339; effect of light and temperature in cocklebur and soybean 302; in Biloxi soybeans as influenced by photosynthetic activity during induction period 256
French, C. S., Absorption spectra of carotenoids in red and brown forms of a photosynthetic bacterium 406
Frozen vacuum-dried material, use in auxin and chemical analyses of plant organs 590
Fuller, G. D., book review 414

G

Gilbert, S. G., Evolutionary significance of ring porosity in woody angiosperms 105
Glendening, G. E., Development of seedlings of Heteropogon as related to soil moisture and competition 684
Goldberg, B., Life history of Peltandra virginica 641
Gourley, J. H., "Modern fruit production" 818
Grasses, chromosomal association and behavior 236; growth in reduced light intensities 582

Green, D. E., "Mechanisms of biological oxidations" 640

Grout, A. J., "Moss flora of North America north of Mexico" 640

Growth substances, and starch hydrolysis in bean leaves 97; effectiveness of tryptophane mixtures 801; effect on absciss layer in Coleus leaves 323; effect on bean 366, 373; on internode of bean 366; on meristem of excised pea roots 576; on starch hydrolysis in bean 393; on sunflower stems 737; histological reactions of bean plants to l-tryptophane 602

Gustafson, F. G., Parthenocarpic and normal fruits compared as to percentage of setting and size 280

H

Hall, Sir A. D., "The genus Tulipa" 223

Hamner, C. L., Effects of vitamin B_1 upon development of some flowering plants 156

Hamner, K. C., Responses of Marchantia polymorpha to nutrient supply and photoperiod 169

Haupt, A. W., Oogenesis and fertilization in Pinus lambertiana and P. monophylla 482

Hayward, H. E., Anatomical and physiological responses of tomato to varying concentrations of sodium chloride, sodium sulphate, and nutrient solutions 437

Heinze, P. H., Influence of localized low temperature on Biloxi soybean during photoperiodic induction 792

Heteropogon, seedling development affected by soil moisture 684

Hillary, B. B., Uses of Feulgen reaction in cytology. II. New techniques and special applications 225

Hill, Helen D., Studies of chromosomal association and behavior and occurrence of aneuploidy in autotetraploid grass species 236

Histological responses of bean plants, to indoleacetic acid 206; to tetrahydrofurfuryl butyrate 373

Hoover, S. R., Production and oxidation of ethyl alcohol by legume nodules 417

Howlett, F. S., "Modern fruit production" 818

Hungate, R. E., Nitrogen content of sound and decayed coniferous woods and its relation to loss in weight during decay 382

"Hunger signs in crops" 819

Huxley, J., "The new systematics" 412

I

Indoleacetic acid, chemical and histological responses of bean plants 206; effect on second internode of bean 366

J

Jacob, K. T., Chromosome catenation in Oenothera 143

Janssen, R. E., "Leaves and stems from fossil forests," "Some fossil plant types of Illinois" 414

K

King, J. R., Method for covering emasculated flowers in plant breeding 217

Koser, S. A., book review 221

Kraus, E. J., Histological reactions of bean plants to l-tryptophane 602; Starch hydrolysis in bean leaves following spraying with alpha naphthaleneacetic acid emulsion 97; book reviews 222, 818

L

Laing, H. E., Effect of concentration of oxygen and pressure of water upon growth of water plants 712

Lambeth, Edith C., Ontogeny of medullary bundles in Apium graveolens 400

Legume nodules, production and oxidation of ethyl alcohol 417

Lepidodendrales 663

Lepidostrobi from central United States 26

Light, effect on floral initiation in cocklebur and soybean 302; of intensity on growth of range grasses 582

Linderstrøm-Lang, K., Peptidase activity in Avena coleoptile: phytohormone test object 50

Link, G. K. K., Use of frozen vacuum-dried material in auxin and other chemical analyses of plant organs: its extraction with dry ether 590

Long, E. M., Anatomical and physiological responses of tomato to varying concentrations of sodium chloride, sodium sulphate, and nutrient solutions 437

L-tryptophane, histological reactions of bean plants 602

Ludwig, C. A., Production and oxidation of ethyl alcohol by legume nodules 417

M

Mackenzie, K. K., "North American Cariceae" 221

Mann, L. K., Effect of some environmental factors on floral initiation in Xanthium 339

Marchantia polymorpha, responses to nutrient supply and photoperiod 169

Marsh, F. L., Water content and osmotic pressure of sun and shade leaves of certain woody prairie plants 812

Mathews, G. B., New Lepidostrobi from central United States 26

McNew, G. L., Agglutination test applied to strains of Phytomonas stewarti 64; Agglutinin absorption by different strains of Phytomonas stewarti 78

McRary, W. L., Nitrogen metabolism of plant embryo 89

Mechanism of mitosis in pollen tubes 629

Megagametophyte development in a triploid tulip 699

Mendes, A. J. T., Polyploid cottons obtained through use of colchicine 287

Metabolism of plant embryo 89

Method, for covering emasculated flowers in plant breeding 217; for softening filbert buds imbedded in paraffin 815

Methods affecting the Feulgen reaction 225

Minor, F. W., Production and oxidation of ethyl alcohol by legume nodules 417

Mitchell, J. W., Responses of vegetative parts of plants following application of extract of pollen from Zea mays 770; Starch hydrolysis in bean leaves as affected by application of growth-regulating substances 393; Starch hydrolysis in bean leaves following spraying with alpha naphthaleneacetic acid emulsion 97

Moisture of soil, effect on seedling development 684

Moulton, J. E., Use of frozen vacuum-dried material in auxin and other chemical analyses of plant organs: its extraction with dry ether 590

Muir, R. M., Effect of bile salts and oleates on structural viscosity of protoplasm 357

Mullison, W. R., Histological responses of bean plants to tetrahydrofurfuryl butyrate 373

Murneek, A. E., Length of day and temperature effects in Rudbeckia 269

Myers, R. M., Effect of growth substances on abscis layer in leaves of Coleus 323

Myers, W. M., Studies of chromosomal association and behavior and occurrence of aneuploidy in autotetraploid grass species 236

N

Nash, L. B., Chemical and histological responses of bean plants grown at different levels of nutrition to indoleacetic acid 206

Naylor, A. W., Effects of some environmental factors on photoperiodic induction of beet and dill 557

Nitrogen, content of coniferous woods, relation to loss in weight during decay 382; fixation studies 417; metabolism of plant embryo 89

Nodule of peanut, response to inoculation with rhizobia 121

Noé, A. C., "Geology of coal" 637

Normal and parthenocarpic fruits compared as to setting percentage 280

Nothoscordum, megasporogenesis 806

Nutrient solutions, responses of Marchantia to supply 169; responses of tomato 437

O

Oenothera, chromosome catenation 143

Olmsted, C. E., Growth and development in range grasses. I. Early development of Bouteloua curtipendula in relation to water supply 499; book reviews 412, 638

O'Mara, J. G., Mechanism of mitosis in pollen tubes 629

Ontogeny of medullary bundles in Apium 400

Oogenesis and fertilization in Pinus 482

Osmotic pressure of leaves of prairie plants 812

Oxidation and production of ethyl alcohol by legume nodules 417

Oxygen concentration, effect on growth of water plants 712

P

Paleobotanical material from central United States 26; from Illinois 663

Parker, M. W., Floral initiation in Biloxi soybeans as influenced by photosynthetic activity during induction period 256; Influence of localized low temperature on Biloxi soybean during photoperiodic induction 792

Parthenocarpic and normal fruits compared as to setting percentage 280

Peanut plant, response to inoculation with rhizobia 121

Pea roots, effects of growth substances on meristem 576
Peltandra virginica, life history 641
Peptidase activity in Avena coleoptile: phytohormone test object 50
Phasic development of wheat 725
Photoperiodic induction, effect of environmental factors 557; effect of localized low temperature 792
Photoperiod, responses of Marchantia 169
Photosynthetic activity during induction period of floral initiation in Biloxi soybean 256
Phytohormone test object: peptidase activity in Avena coleoptile 50
Phytomonas stewarti, agglutination test 64; agglutinin absorption 78
Pinus, oogenesis and fertilization 482
Pollen, mechanism of mitosis in tubes 629; of Zea mays, effect of application on plants 770
Polyploid cottons obtained through use of colchicine 287
Polysomaty in Spinacia 759
Pool, R. J., "Flowers and flowering plants" 819
Protoplasm, effect of bile salts and oleates on structural viscosity 357
Purity of chlorophyll components affected by preparative procedure 463

Q

Quibell, C. H., Floral anatomy and morphology of Anemopsis 749

R

Range grasses, early development in relation to water supply 499; response to light intensities 582
Reed, Fredda D., Coal flora studies 663
Rehder, A., "Manual of cultivated trees and shrubs" 638
Responses, of Marchantia to nutrient supply and photoperiod 169; of plants following application from pollen of Zea mays 770; of sunflower to growth-promoting substances 737
Rhizobia, peanut plant inoculation 121
Ring porosity in woody angiosperms 105
Robbins, W. J., Further observations on factor Z 520
Rudbeckia, day length and temperature effects 269

S

Salts and oleates, effect on structural viscosity of protoplasm 357
Sass, J. E., "Elements of botanical microtechnique" 414
Sax, K., Mechanism of mitosis in pollen tubes 629
Schopf, J. M., book review 637
Schuster, C. E., Method for softening filbert buds imbedded in paraffin 815
Seed, double fertilization and development in angiosperms 1; formation of in Cypripedium parviflorum 295
Setting percentage in parthenocarpic and normal fruits 280
Sherff, E. E., book reviews 221, 223, 224
Shull, C. A., book reviews 413, 414, 415, 639, 819, 820
Smith, O., Chemical and histological responses of bean plants grown at different levels of nutrition to indoleacetic acid 206
Snedecor, G. W., "Statistical methods" 415
Snow, Edna, Desmids of Mirror Lake, Utah 410
Snyder, W. E., Effect of light and temperature on floral initiation in cocklebur and Biloxi soybean 302
Soybean, effect of light and temperature on floral initiation 302; effect of localized temperature 792; floral initiation influenced by photosynthetic activity 256
Spectra absorption, results on chrorophyll components 463
Spinacia, polysomaty 759
Spinning a covering for emasculated flowers 217
Spraying, alpha naphthaleneacetic acid on bean leaves 97
Starch hydrolysis in bean leaves, affected by growth-regulating substances 393; following spraying with alpha naphthaleneacetic acid emulsion 97

Sunflower, influence of sulphur deficiency 536; response of stems to growth substances 737
Sulphur deficiency in sunflower 536
Swingle, D. B., "General bacteriology" 221

T

Techniques and the Feulgen reaction 225

Temperature, effect in Rudbeckia 269; effect on floral initiation in cocklebur and soybean 302; effect of localized on soybean 792

Tetrahydrofurfuryl butyrate, effect on bean 373

Tomato, anatomical and physiological responses to nutrient solutions 437

Tryon, R. M., Jr., "The ferns and fern allies of Wisconsin" 639

Tryptophane, histological reactions of bean plants 602; effectiveness of mixtures 801

Tulip, megagametophyte development 699

V

Viscosity of protoplasm, effect of bile salts and oleates 357

Vitamin B_1, effects on development of flowering plants 156

Voth, P. D., Responses of Marchantia polymorpha to nutrient supply and photoperiod 169; book reviews 222, 639, 640, 819

W

Water content of leaves of prairie plants 812

Water pressure, effect on growth of submerged plants 712

Water supply, relation to early development of Bouteloua curtipendula 499

Wheat, phasic development 725

Whitehead, Muriel R., Responses of vegetative parts of plants following application of extract of pollen from Zea mays 770; Starch hydrolysis in bean leaves as affected by application of growth-regulating substances 393; Starch hydrolysis in bean leaves following spraying with alpha naphthaleneacetic acid emulsion 97

Willis, J. C., "The course of evolution" 638

Wilson, P. W., "The biochemistry of symbiotic nitrogen fixation" 639

Wort, D. J., Phasic development of Marquis and Fulhio wheats 725

X

Xanthium, effect of environmental factors on floral initiation 339

Z

Zea mays pollen, effect on plants 770

Z factor, further observations 520

Zscheile, F. P., Influence of preparative procedure on purity of chlorophyll components as shown by absorption spectra 463
